**The reason i have the concession attachad to movies becasue the data is collected based on what movie and genre is the audience buying concessions for.**

Movies

PK	most_watched	varchar(200)
FK	order_amount	integer(50)
	hours_watched	integer(200)
	movie_genre	varchar(200)
	movie_id	integer(200)
	packed_theater	integer(50)

Customer

PK	CUSTOMER_ID	VARCHAR(200)
	DOB	VARCHAR(200)
	SSN	INTEGER(60)
	FIRST_NAME	VARCHAR(200)
	LAST_NAME	VARCHAR(200)
	STUDENT_ACC	VARCHAR(200)
	EMAIL_ACC	VARHCAR(200)
	AGE_	INTEGER(20)
	GENDER_	VARCHAR(200)
	VETERAN_	VARCHAR(200)
	THEATER_MID	INTEGER(50)

Tickets

PK	order_amount	integer(200)
FK	reserved_tic	integer(200)
	pre_reserved	integer(200)
	price_tickets	integer(200)
	movie_id	integer(200)

Concessions

PK	genre_invoice	integer(50)
FK	fav_movies	varchar(200)
	movie_language	varchar(200)
	most_pur_food	varchar(200)
	items_ordered	integer(200)

The bond between customers and tickets is one zero or many is becasue depending on the customer either having a theater membership can have one zero or many tickets only if he/she is not coming in between the reserved customer tikets already booked.
